

# PC-DocuMate<sup>T.M.</sup>

Keyboard documentation templates for the IBM Personal Computer

## MODEL PC-110 FOR DOS/BASIC version 1.10

The PC-DocuMate Model PC-110 provides definitive documentation of commands and formats for DOS 1.10, EDLIN, DEBUG, and BASIC. The front side of the template contains the DOS command reference including function and special key definitions. BASIC commands and keyword abbreviations are also shown on the front. Key symbols are used to define frequently used control key combinations.

The reverse side of the template gives an extensive statement and syntax reference for BASIC (including advanced BASIC). Statements are organized into "I/O" and "Non-I/O" categories and all BASIC functions are listed for convenient reference.

PC-DocuMate templates are thoughtfully designed by a software professional to enhance the end user's productivity. Each template is comprehensive and definitive in its documentation. The templates are precision die-cut from .030" polystyrene which has been color matched to the PC keyboard. A matte finish prevents glare. The templates are silk-screen printed on both sides to exacting standards in black ink which permanently bonds to the plastic and will not wear or fade. Every PC-DocuMate template is sold with a 10-day moneyback guarantee.
